RESOLVING OUR SHARED ENVIRONMENTAL CHALLENGES: THE PRACTICE OF COLLABORATION AND MULTI-PARTY PROBLEM SOLVING

SPEAKER: Brian Manwaring, U.S. Institute for Environmental Conflict Resolution

DATE: Wednesday, October 16th, 2019

TIME: 3:00-4:00 pm

LOCATION: ENR2, S107

ABSTRACT: Collaborative approaches to environmental and natural resources management are often used to address challenges that span multiple political jurisdictions and impact a broad spectrum of stakeholders. This talk will explore examples of complex, regional water management institutions to understand the types of issues they are created to address and the underlying conditions that enable successful collaboration. It will also describe facilitative tools that may be applied to evaluate the political, legal and substantive landscape to support planning for a robust collaborative process.
